*RAILROAD LANDS. *

M NOTICE TO SETTLERS. >

I have Syndicates figuring to close out the usual Railroad sections in Summit County, and it is necessary to know immediately what land the settlers intend to purchase now. If you do not secure the range you have been using, it will be your own fault.

C. E. WANTLAND, Agent, 235 Main Street.

STATISTIC

of Utah.

Butter and Cheese, Bees and Honey, Wool and Sheep, Live Stock, Mines and Other Industries.

In accordance with the act of the legislature passed at the last session, Statistician ph Lippman yesterday filed his statistical report with Secretary Sells. The report is very complete and contains much valuable information. It will be printed and 5,000 copies circulated. The report is having an average value of \$25,001. very lengthy, but the most important portions of it are given below.

In regard to acreage the report shows that during the calendar year 1890 there were 574,540 acres of land under cultivation of which 330,750 were actually irrigated. Crops were raised on 381,222 acres. one per cent of the entire area of the ter-

A general description is given of the twenty-five counties in their order, the substance of which is shown in the follow-

WHENT

Of the wheat product the report says: The total acreage of wheat in Utab in 1890 was 130,114, producing 2,499,454 bushels. Cache county stood first in the order of quality yielding 517,131 bushels—altitle over 200,030 bushels more than Sampste, the next in the order of production, which yielded 211,066 bushels. Utah stands first in the order of counties as to yield per acre, her average being 35 bushels. Iron county is rext, whose average was 29 bushels. Kane, Salt Lake and Sampute average 425 bushels. The total value of the wheat product for the territory on a basis of 80 cents per bushel was 21,027,563,20.

The United States census for 1530 gives

inited States census for 1890 gives Utah's average wheat crop at 17% bushels per acre. The territorial statistician gives it at 27 bushels. According to the report of United States Statistician Dodge for the ten years ending 1890, the average wheat crop of the United States was in that period 12 bushels per acre, having an average value of 2005. By this report the highest average yield outside of Utah was 19,5 bushels per acre in Colorado. Utah's 19,5 bushels are acre in Colorado. Utah's yield for 1890 was 12% bushels ahead of this.

OATS.

MISCELLANZOUS PRODUCTS.

MISCELLANZOUS PRODUCTS. Utah's average wheat crop at 17% bushels

During the year 1830 there were 32,703 acres of oats cultivated, yielding 1,132,218 bushels, valued at 4532,142.46. In the order of quantity Utah county stood first, producing 12,804 bushels. Sampete produced 130,306. Box Elder was twelfth in the order of quantity, but first in the average of yield per acre. Her yield was 50 bushels. The average of the territory was 34 bushels. The general average for the United States, according to Dodge's report was 25,6 bushels. was 20.6 bushels.

BARLEY.

Of Utah's bariey the report says:

Utah is famous for its fine quality of barley. In 1890 it had 7,355 scres under cultivation, yielding 212,546 bushels, valued at \$106,273. Utah county produced 49,795 bushels, and was first among the counties Davis county followed with a yield of 40,007 bushels. Sait Lake county yielded 185,538 bushels, Weber 18,390, and Toole 18,190. Emery produced no barley. Garfield, Utah, Pinte, Sait Lake, Sanpete, Be produced per acre 52 bushels, Sapete She produced per acre 52 bushels, Sapete of the terrices.

Cache, Summit, woods, Sail Lake, A. W. Butter and Sanpete.

Light, Davis and Sanpete.

Butter and Cheese.

In 1890 the territory produced 1,847,447 pounds of butter valued at \$23,330,23. The total cheese product at \$23,330,23. The total spring are founds of butter valued at \$23,330,23. The total spring are founds of butter valued at \$23,330,23. The total cheese product at \$23,330,23.

There were \$.10 acres of corn planted in Utah in 1890, which yielded 165,000 bushels, valued at \$118,848.24. Utah county was first, yielding 46,658 bushels. Sait Lake county was second, producing 16,051 bushels. Morgan, Rico, Sammit and Wasatch produced no corn. The average yield per nore over the territory was 19 bushels. In this respect Kane stood first, averaging 33 bushels. The average in the United States for ten years previous to 1990 was 24.1 per acre. 1890 was 24.1 per acre.

Of rye the report says: Rye is a crop for poor soils and is not much grown in Utah. The acrease of 1890 was 3,709; production, \$4,994 bus bels: value, \$27,574.44 Rye was not raised in Emery, Garfield, Grand, Iron, Morgan, San Juan, Washington, or Wasatch. Box Elider county was its to quantity raised, producing 18,775 bushels. Miliard produced 5,665 bushels. Miliard produced 3,665 bushels. Miliard produced 3,665 bushels. Miliard leads the counties in the average yield per acre at thirty-one bushels. Utah county yielded twenty-eight bushels per acre, and Sanpete leads the counties in the average yield per acre at thirty-one bushels. Utah county yielded twenty-eight bushels per acre, and Sanpete leads the counties in the average yield of the United States for the territory was twelve bushels. The average yield of the United States for the territory in 1890 was 52,096; valued at \$1,050,086. Cache county stood in the lead with 5,276, with Salt Lake and Sevier following with aimost the same number. In 1890 the territory possessed 237,458 head of catte valued at \$6,001,870. In this most produced 18,001,870. The total number of mich cows in the territory in 1890 was 52,096; valued at \$1,050,080. Cache county stood in the lead with 5,276, with Salt Lake and Sevier following with aimost the same number. In 1890 the territory possessed 237,458 head of catte valued at \$6,001,870. In this respect washington leads with 23,417; San Juan follows with 22,295.

The horses of the territory numbered 80,-100,000.

n 1890 the acreage of the territory

in the average yield per acre, her crop during the season amounting to 6 tons. All ard raised 4.93 tons, and Grand 3.69 tons. Sait Lake is sixth on the list, Utah ninth and Weber tenth. The average of the whole territory was 3 tons per acre, having an average value of \$15,000

The total acreage of hay, says the report, in 1890 was 20,647, producing 120,572 tons, veined at 81,637,857,76. In this product Cache county lead with a yield of 17,522 tons. Utah county follows with a yield of 14,661. Morgan county leads in the average yield. Her crop per acre was 3,20 tons. Sait Lake follows with 2,93 tons. Welter yielded 2,63 tons and Garfield 2,27 tons. The average yield for the territory was 1,49 tons. This report includes red top, thintiny and all the native grasses of the territory. The average yield of the United States for ten years previous to 1890 was 1,19 tons per acre.

POTATOES.

The report says of the Utah potatoe crop:

The report says of the Utah potatoe crop:
The Utah potatoe is justly famous all over the United States. Like oats, the potatoe is adapted to cool climate and high attitude. In 1890, Utah cultivated 7,845 acres, which yielded 935,574 bushels. The average price of 53 cents per bushel was high owing to the scarcity of the crop. The total value is placed at \$495,013.22. In quantity Utah county leads with a total yield of 285,784 bushels. Sait Lake produced the same year 117,030 bushels, Weber, 101,107, and Cache 88,534. Utah also leads in the average price age per acre, her crop running up to 168

Silver.

During 1890 the four bituminous mines in Utah produced 355,551 tons, valued at \$572,519. The Scotleid mines yielded of this amount \$335,750, Castle Gate \$175,527, Coaville \$63,238.

Following is the total mineral output of the territory:

\$20,000 Cache 88,394. Utah also leads in the average per acre, her crop rouning up to 105 bushels. Usntah and Sait Lake countles yielded 126 bushels. Davis 124. Box Elder 126, and Morgan 119. The average for the territory was 119 bushels. The average potatoe crop of the United States for the ten years previous to 1890 was 76.2 bushels per acre. Utah's average for the same acried was 90.5 bushels. eriod was 90.5 bushels

On the Utah beet crop the report says: In 1890 the territory had only \$772 acres planted in beots, which yielded 21,725 The plants were valued at \$7,604.10. Salt Lake raw material consumed was valued at county produced 8,654 bushels. Weber \$2,137,291, and the manufactured product 0,253, Cache 2,152 and Utah 1,935. Since these fligures were outsined a beet sugar reported at \$4,805,891. The total invested capital is the county and the cultivation of beets has been established in Utah county and the cultivation of beets has been engaged in on an extensive scale. The avera e pield of the territory was 248 bushels per abre. Unitah county leads the list with an average of 551 bushels. Cache raised 410, Salt Lake 383 and Weber 313. not be taken as an average year either for neid or price, owing to the partial drouth that prevailed and the extraordinary demand for cereals.

Bests, which averaged throughout the raised 410, Salt Lake 383 and Weber 313.

COTTON. Warsington, says the report, is the only cotton producing county in the territory. It averages 600 pounds to the acre. The average for all the scattern states during the ten years previous to 1890 was 163.1 pounds. The augusts average of any state during that period was that of Louisiana, which reported 182.7 pounds per acre. Washington county in 1890 cultivated seven acres, the crop of which was valued a \$462.

ORCHARDS.

During the year 1800, says the report.

During the year 1800, says the report, there were 5,275 acres of orchards in Utah yielding 8,346,062 pounds of fruit, valued at 8206,151,55. Utah county holds the first place as to quantity, followed by Weber, Pavis and Cache, in the order named. Iron, Saupete, Sevier, Summit and Wa satch make no r port. Kans county yielded \$.057 pounds per acre, Junb 3,078, Washington 2,025, and Cache 2,341. The average yield of the territory was 0,503.

VINEYARDS. In 1500 only fourteen counties raised grapes; of those the total area was 365 acres. The yield was 565,560 pounts, and the value of the yield \$33,960.60. The leading ape county is Washington, the yield there being 200,000 pounds. Utah county raised 150,400, and Weber 89,250 pounds. The average yield per core for the territory was 2,134 pounds. Weber's average was 6,805. Washington's 4,000, and Kane county's 2,958. county's 2,258.

MISCELLANZOUS PRODUCTS.

The average yield throughout the territory was 0.426 pounds per acre. Davis county reports 18,642, Cache 12,496, Juab 5,825 and Box Elder 7,827 pounds per acre. WINE AND CIDER.

WINE AND CIDER.

In 1890 the territory produced 31,865 gallons of wine valued at \$25,007.49. Washington leads with 23,967 gallons. Utah county is next, producing 3,550 gallons. Grand county produced 1,056 gallons.

The thirteen cider producing counties in 1800 yielded 61,508 gallons, worth \$21,478 SO. The principal cider and wine producing counties are Washington, Utah, Grand, Cache, Summit, Weber, Sait Lake, Box Elder, Davis and Sanpete.
